## ABSTRACT

One phase of a five-phase professional improvement assessment project developed a database that identified the professional improvement needs of postsecondary technical/vocational personnel and the policies and procedures of the institutional plans for faculty development in Texas. Following a review of the literature, a questionnaire was prepared and mailed to the coordinator or director of the institutional plan for faculty development of the 70 campuses of the 55 community colleges and technical districts in Texas; 47 of the districts responded (86 percent). The study found that each of the two-year postsecondary institutions had a functional institutional plan for faculty development. Sixty-four percent of the responding institutions used a committee to advise and/or assist with the professional development activities. The data revealed that policies of the institutional plans provided equal requirements and provisions for technical/vocational personnel and all other professional personnel of the institution. The study reached three conclusions: (1) each institution is making an active and sincere effort to plan and conduct faculty development activities to meet personnel needs; (2) institutions need technical assistance in maintaining a current assessment of the professional development needs of technical/vocational personnel; and (3) there is a need for assistance in planning and conducting activities to meet the identified professional development needs. The study recommended that the research and personnel development activities be continued. (The questionnaire is appended.) (KC)

## **I. INTRODUCTION**

## **Policies**

### **Background**

This summary report is one of five summary reports generated by the Professional Improvement Assessment project. The Professional Improvement Assessment project was conducted by the University of North Texas. The University of North Texas was the successful bidder for the Coordinating Board's RFP:

1300-B, an assessment of current institutional policies and activities with respect to funding and other support of faculty development, and development of case studies of effective models for dissemination to encourage implementation of effective practices and/or workshops.

The objectives of the approved project were:

- A. Conduct an assessment of technical/vocational faculty and staff  
(administrators, counselors) professional development activities currently being conducted by Texas community/junior colleges and technical institutes.
- B. Prepare and disseminate the results of the assessments.
- C. Evaluate the project in terms of project installation, process, and products.

### **Statement of the Problem**

The major purpose of this phase of the study was to develop a database that identified the professional improvement needs of postsecondary technical/vocational personnel and the policies and procedures of the institutional plan for faculty development of technical/vocational personnel. Two anticipated results of the project were:

1. The establishment of a database that could be used by staff of the

**Community College and Technical Institutes Division of the  
Coordinating Board in making management decisions to improve,  
modernize, and develop a higher quality of statewide postsecondary  
technical/vocational professional improvement activities; and**

- 2. The findings of the study could be used by the coordinators/  
directors of local institutional plans for faculty development to  
better meet the professional development needs of technical/  
vocational personnel.**

## II. Procedures

One of the specific requirements of the RFP for which this project was contracted was to conduct a statewide assessment of the policies and procedures of postsecondary institutional plans for faculty development. A review of the literature was made by the project staff to identify previous research procedures used in the assessment of policies and procedures of postsecondary institutions used for faculty development.

The review of the literature revealed that most all of the procedures used in previous research conducted for this topic were similar in format and content to the requirements of the respective regional college accrediting association. A draft of a proposed questionnaire designed to assess the policies and procedures of local institutional plans was developed and submitted to the members of the project advisory committee. The questionnaire was revised, using the recommendations of the advisory committee members, and prepared for mailing. The questionnaire, presented in Appendix A, was developed and worded in a manner which would most reflect the intent of the Coordinating Board's guidelines for technical/vocational personnel. The Texas Higher Education Coordinating Board's Technical and Vocational Personnel Guidelines state:

An Institution must provide faculty, career development personnel, and administrators in technical and vocational programs the opportunity to continue their professional development throughout their careers and must demonstrate that such development takes place. The general tone and policies of an institution must make it clear that individual faculty and staff members are to take the initiative in promoting their own professional growth.

The survey questionnaire was mailed to the coordinator or director of the institutional plan for faculty development of the seventy campuses of the fifty-five community colleges and technical institute districts. Forty-seven of the fifty-five postsecondary districts responded to the request for data, providing an overall response rate of eighty-six percent. Responses were received from seventy-nine percent of the seventy campuses.

A complete description of the procedures for conducting the project is printed in the Final Report sent to the Coordinating Board. Other summary reports resulting from this project are:

- Summary Report of the Professional Improvement Needs of Postsecondary Career Counselors;
- Summary Report of the Professional Improvement Needs of Faculty For Postsecondary Health Occupations Programs;
- A Compilation of Reported Professional Development Activities and Effective Models of Faculty Development for Postsecondary Technical/Vocational Personnel; and
- Summary Report of the Professional Improvement Needs of Postsecondary Career Counselors.

### **III. Summary of Findings**

The questionnaire used in conducting this assessment of policies and procedures consisted of questions that would best reflect the intent of 9.65 of the Texas Higher Education Coordinating Board under Title 19 of the Texas Administrative Code.

9.65 (c) states:

All public community/junior colleges shall demonstrate promotion of teaching excellence by developing an institutional plan for faculty professional development.

(1) The institutional plan must address full and part-time teacher preparation and professional development.

(2) The institutional plan shall reflect the personnel requirements as stated in the Coordinating Board publication "Qualifications of Technical and Vocational Personnel" and adhere to the standards of the college delegate assembly of the Commission on Colleges of the Southern Association of Colleges and Schools.

The survey results showed that all of the responding institutions had policies and procedures adopted and had implemented an institutional plan for faculty professional development.

The responses to questions on the survey which could be answered without narrative are presented in Table 1. It was found that ninety-five percent of the respondents' institutional plans included provisions for the institution to plan and conduct professional development activities. Only five percent (three respondents) of the respondents had institutional plans that did not include planning and conducting professional development activities for faculty. These three institutions did require that the faculty and staff arrange and schedule their own professional improvement activities. It was observed that seventy-two percent of the institutions that planned and conducted professional development activities also required the faculty and staff to schedule and arrange for their own professional development activities.

**Table 1**

**Tabulation Responses to Questions on the Survey of Institutional/Policy Procedures  
of Public Two-year Postsecondary Institutions in Texas**

		Number of Institutions Responding	Percent of Respondents Checking Yes		
1.	Does your institutional plan include provisions for the institution to plan and conduct professional development activities?	56	95		
2.	Does your institutional plan require that faculty and staff arrange and schedule their own professional improvement activities?	50	76		
4.	Is a committee(s) used to advise or assist with the professional development activities?	56	64		
		Technical Vocational Personnel	All Non-Technical Vocational Personnel		
		<u>N</u>	<u>% Yes</u>	<u>N</u>	<u>% Yes</u>
6.	Are separate committees used for:				
a.	Full-time instructors?	42	12	40	13
b.	Part-time instructors?	42	7	39	5
c.	Administrators?	41	7	39	8
d.	Career Counselors?	39	3	37	3
		<u>N</u>	<u>% Yes</u>	<u>N</u>	<u>% Yes</u>
7.	Does your institution require participation in professional improvement activities by:				
a.	Full-time instructors?	53	79	47	72
b.	Part-time instructors?	49	33	46	30
c.	Administrators?	51	67	44	61
d.	Career Counselors?	51	65	46	61

It was found that sixty-four percent of the respondents used a committee or committees to advise or assist with the professional development activities. Question 6 of the questionnaire was posed to determine where separate committees were used and if there was a significant difference in the use of committees for technical/vocational personnel and non-technical/vocational personnel. It was found that there was no significant difference in the use of separate committees for technical/vocational personnel and non-technical/vocational personnel. The number of separate committees used by staffing pattern ranged from a low of three percent of respondents for counselors to a high of thirteen percent of respondents for full-time instructors.

The membership of the committees for faculty development changed annually. A great number of the respondents reported that a chair for the committee for faculty development was elected or appointed each year. The chair of the committee and the institutional representative (coordinator/director) for the institutional plan for faculty development were not, in many cases, the same individual. In most cases the coordinator/director of the institutional plan for faculty development maintained that position for two or more years. In community college districts with two or more campuses it was found that each campus had separate committees and institutional plans. The institutional plans of the individual campuses were operated under general policies of the district but were designed to meet the needs of the individual campus.

It was found that a greater number of the responding institutions required participation in professional improvement activities of full-time technical/vocational instructors (79%) than was required of full-time non-technical/vocational instructors (72%). Refer to question 7 tabulations in Table 1.

TABLE 2

Comparison of Responses for Technical/Vocational Personnel  
and Non-Technical/Vocational Personnel for Questions 8, 9, and 10

Table 2 shows a comparison of the responses for technical/vocational personnel and non-technical/vocational personnel for questions 8, 9, and 10 on the questionnaire.

A review of Table 2 reveals that there is very little difference in the requirements for personnel development and incentives of the responding institutions between technical/ vocational personnel and non-technical/vocational personnel. Less than fifty percent of the respondents required participation in professional development activities for advancement on the institution's salary schedule/salary increase.

As presented in Table 3, the most common incentive/reward used to encourage the participation of technical/vocational personnel in personnel development activities was release time. Eighty-nine percent of the respondents provided release time for full-time technical/vocational instructors to participate in professional development activities. However, only forty-two percent of the institutions provided release time to part-time faculty as an incentive to participate in professional development activities.

**Table 3**  
**Incentives/Rewards Used to Encourage**  
**Participation of Technical/Vocational Personnel**  
**in Professional Development Activities**

Incentive	<u>Full-time Instructors</u>		<u>Part-time Instructors</u>		<u>Administrators</u>		<u>Career Counselors</u>	
	N.	Percent of Respondents	N.	Percent of Respondents	N.	Percent of Respondents	N.	Percent of Respondents
Release Time	54	89%	53	42%	54	85%	56	79%
Participation Required	53	42	46	7	48	19	51	29
Financial	55	56	52	19	54	30	53	42

Table 4 presents the responses to the question, "Do you maintain a professional growth or contract with:?" Full-time technical/vocational instructors was the category of personnel with which the greatest number of respondents (52 percent) maintained a professional growth plan or contract.

**Table 4**

**Percent of Respondents Maintaining a  
Professional Growth Plan or Contract  
with Faculty and Staff**

<u>Category of Personnel</u>	<u>Technical/Vocational Personnel</u>		<u>All Non-Technical/Vocational Personnel</u>	
	Number of Respondents	Percent of Respondents	Number of Respondents	Percent of Respondents
Full-time Instructors	54	52%	51	51%
Part-time Instructors	48	8	45	7
Administrators	53	40	50	40
Counselors	53	40	50	40

A variety of techniques were used by the two-year postsecondary institutions to recognize or document professional development activities. As shown in Table 5, the most common technique used was informal feedback as reported by forty-four of the respondents. Only two respondents reported that no evaluation or documentation was used.

**Table 5**

During the past fiscal year, seven institutions provided paid sabbatical leaves for sixteen instructors of technical/vocational programs and 1 career counselor. Also as observed in Table 6, nine institutions provided financial support for 107 technical/vocational instructors to participate in courses offered at other colleges and universities. Travel expenses for 1,462 trips of instructors, 236 trips of administrators, and 78 trips of career counselors to participate in conferences, workshops, or seminars, were paid by forty-seven of the institutions responding to the survey.

**Table 6**

**Participation of Technical/Vocational Personnel  
in Professional Development Activities for  
the Previous Fiscal Year**

Service	Number of Technical/Vocational Personnel Using Service i.e.				
	Part-Time Instructors	Full-Time Instructors	Administrators	Career Counselors	Number of Respondents
Paid sabbatical leave		16		1	8
Mini-sabbatical paid leave (less than one year)		7			5
Release time for professional development (paid)	12	504	86	25	22
Unpaid leave for professional development	12	41	5		11
Faculty exchanges with other colleges		1			1
Financial support for courses at other colleges/universities		107	4	1	9
Tuition waiver for at own institution	5	603	194	172	24
Paid professional membership dues		375	64	13	21
Paid expenses for attendance at conferences, workshops, seminars	28	1,462	236	78	47
Planned Retreats	25	315	84	17	12

Table 7 shows the budgetary mechanism used to fund professional development activities. Based on the responses received, some of the institutions use multiple budgetary mechanisms. The use of "one single institutional line item" was reported by thirty-two institutions while thirty-three institutions reported using "line item budget used by department/division." Two of the responding institutions did not have a budgetary provision for professional development.

**Table 7**

Table 8 shows sources of funds and amounts of funds from each source expended for the professional development of technical/vocational personnel.

**Table 8**

**Source and Approximate Amount of Funds by Source Spent by Responding Institutions for Professional Development Activities of Technical/Vocational Personnel During the Past Fiscal Year**

<u>Source</u>	<u>Number of Institutions</u>	<u>Range of Funds</u>			<u>Total</u>
		<u>Low</u>	<u>Mean</u>	<u>High</u>	
Local General Operating Fund	39	\$ 500	\$21,671	\$127,000	\$ 845,185
Carl D. Perkins	36	\$1,800	\$ 9,583	\$ 40,000	\$ 344,981
Local Industry	1	NOT REPORTED			
<u>Other</u>	4				
Professional development leaves	\$34,000				
Halliburton Foundation	10,296				
Title III	26,683				
Foundation	10,000				\$ 80,979
Total of funds reported used for technical/vocational personnel development					\$1,271,145

Three other surveys conducted by this assessment project requested information that was related to the institutional plans for faculty development. Postsecondary administrators of technical/vocational programs, instructors of health occupations programs, and career counselors were asked two questions related to their evaluation of their respective institutional plan for faculty. The two questions and responses on the three surveys that related to the institutional plan for faculty development are presented in Tables 9, 10, and 11. The information shown on these three tables indicate that the professional improvement activities being conducted at the institutional level for these three groups of personnel have great opportunities for improvement.

#### **IV. Summary, Conclusions, and Recommendations**

##### **Summary of Findings**

The data presented for this study was collected from forty-seven of the fifty-five public community/junior colleges and technical institute districts in Texas. It was found that each of the two-year postsecondary institutions responding to the survey had a functional institutional plan for faculty development. Sixty-four percent of the responding institutions used a committee to advise and/or assist with the professional development activities. The data revealed that policies of the institutional plans provided equal requirements and provisions for technical/vocational personnel and all other professional personnel of the institution.

There are indications, based on the responses of the administrator, career counselor, and health occupations instructors respondents that local professional development activities, on a state-wide bases, are not meeting the faculty development needs of technical/vocational personnel.

##### **Conclusions**

Based on the findings of this study it is concluded that:

- (1) Each public two-year postsecondary institution is making an active and sincere effort to plan and conduct faculty development activities to meet the professional development needs of technical/vocational personnel;
- (2) There is a need for technical assistance to be provided to each of the institutions in maintaining a current assessment of the professional

- development needs of technical/vocational personnel; and
- (3) There is a need for assistance in planning and conducting activities to meet the identified professional development needs.

### **Recommendations**

The following recommendations are made based on an analysis of the findings of this study.

- (1) The statewide assessment of the professional development needs of postsecondary technical/vocational personnel be continued on a three-year interval.
- (2) The results of the statewide assessments should be compiled and disseminated on a state and institutional basis.
- (3) All personnel development activities for postsecondary technical/vocational personnel, supported by PL 101-392 ("State Program") funds at the state level, should be conducted on a statewide basis.
- (4) The "state program" of personnel development for postsecondary technical/vocational personnel should be conducted with the assistance of a State Advisory Committee composed of postsecondary technical/vocational personnel, representatives of vocational teacher education institutions, and members of the Federal Projects staff of the Texas Higher Education Coordinating Board.
